

NEW!

Traveller HD

Read anywhere! Unlike a desktop magnifier the revolutionary Traveller HD allows you to comfortably read letters, newspapers and other materials at the dining table, in bed, or in your favorite chair.

The Traveller HD is small enough to easily use it at home, in the office, at school and even take it on vacation, making this portable video magnifier your ideal lightweight reading companion.

The unique Slide & Read mechanism provides you with a more natural reading experience, by simply sliding the screen across a line of text and viewing the content on-screen. It has never been easier to follow the line or sentence, especially for people finding it difficult to keep a steady hand. Sliding back and forth enables you to recognize the shapes of individual words faster. This allows you to see a more complete line of text on the large screen, enabling you to read more fluently.

With the Traveller HD you can see smaller details of photos and text on its bright 13.3-inch widescreen, thanks to the superior high definition camera with stepless and variable zoom, plus an adjustable magnification starting at 2.4 times.

Optelec Traveller HD
